

Electricity Scavenger Hunt

Name(s):

Make a Prediction

About how many things do you think you use each day that need electricity? Tell why you picked that number.

Take a Look

With your caregiver, check your home for items that use electricity. Write down everything that uses a battery, a plug, or some other form of electrical energy to work.

If you have more than one of the same item in the same place, use tally marks to keep track of how many you find. For example, if there are two lamps in your caregiver's bedroom, you would fill the chart out like this:

Location	Item	Number (tally marks)
<i>Ex.: Caregiver's Bedroom</i>	<i>Lamp</i>	<i>//</i>

Electricity Scavenger Hunt

How many items did you find?

How did that compare to your original estimate? Explain.

Before doing this activity, how often did you think about the amount of electricity in your life? Explain.
