

After Dinner Science: Candling Recording Sheet

Name(s):	
Date:	

Day:	
Egg:	

In the box below, sketch what you see when you candle the egg or add a photograph showing the candled egg. Label the different parts of the egg and embryo.

Describe how the embryo has changed so far. (If you have not candled this egg before, you can compare it to pictures of other eggs that show earlier stages.)

How well do you think the embryo is growing inside this egg? Tell why you think this.
