

Find Your Flock: Reflection

Name:	
Date:	

Pick one pair of cards that shows a baby chick and an adult chicken from the same breed. It can be one of your pairs or a friend's pair. Look closely at the chick and the adult chicken.

What are some features (things like muffs, beards, boots, comb types, and feather colors) that you notice on both chickens?

What are some features that you only see on the chick?

What are some features that you only see on the adult chicken?

What are some chicken features that you do not see on either the chick or the adult?

Complete the first Venn Diagram to compare and contrast the baby chick and the adult chicken. "Compare" means tell how they are alike. "Contrast" means tell how they are different.

Baby Chick

Breed: _____

Adult Chicken

Find Your Flock: Reflection

Next, pick a card from a different breed.

If you pick a new chick card, then get rid of the chick card you already had.
If you pick a new adult card, then get rid of the adult card you already had.
You should now have a chick from one breed and an adult from a second breed.

Complete the second Venn Diagram to compare and contrast a baby chick from one breed to an adult from a different breed.

What are some features (things like muffs, beards, boots, comb types, and feather colors) that you notice on both chickens?

What are some features that you only see on the chick?

What are some features that you only see on the adult chicken?

What are some chicken features that you do not see on either the chick or the adult?

Need help? Here are some questions to think about.

1. What color are the feathers? Do they have any patterns? Do you see a crest or muff? Are there any other unusual feathers?
2. Do the legs have feathers? What color is the chicken's skin? How many toes do you see?
3. What color is the beak? What color are the earlobes? What color are the eyes?
4. What kind of comb can you see?

True or False?	
	All baby chickens look alike.
	Baby chickens usually look similar to their parents.
